THE LAST CHICK

OFFICIAL WHITEPAPER

Hope That Survives, Inspires, and Creates a New Future.

Version 1.0 | November 2026 | Built on Base Network

---

1. Introduction

The Last Chick (TLC) is an innovative Web3 project built with the vision of bringing together blockchain technology, the digital economy, creativity, entertainment, and social responsibility.

TLC believes that technology becomes more meaningful when it not only creates digital and economic opportunities but also serves as a source of hope, compassion, and positive change in people's lives.

Inspired by the symbolic story of the last surviving chick, TLC aims to go beyond the concept of a digital asset and evolve into a dynamic, community-driven ecosystem where tokens, products, games, NFTs, and social initiatives come together.

Built on the Base network, The Last Chick envisions creating a bridge between the digital world and real life — a bridge founded on innovation, participation, and hope.

2. The Story and Philosophy of The Last Chick

In a world overshadowed by darkness, hardship, and uncertainty, one small chick remains alive — a symbol of the last spark of hope and the possibility of a new beginning.

The Last Chick is a story about resilience and refusing to give up, even when circumstances seem difficult.

The chick represents everyone who continues to believe in a better future despite life's challenges. It represents children who need opportunities, kindness, and support, as well as vulnerable and abandoned animals that depend on human compassion and care to survive and live better lives.

The philosophy of TLC is built around one fundamental message:

> **Hope should not remain merely a feeling; it should become an opportunity for change and for building a better future.**

This philosophy forms the foundation of The Last Chick's identity and will be reflected throughout its products, ecosystem development, community engagement, and social vision.

3. Vision & Mission

Vision

To establish The Last Chick as an international brand and ecosystem in the Web3 space, bringing together technology, the digital economy, real-world products, entertainment, and social responsibility within one integrated structure.

TLC aims to become a project that extends beyond the blockchain environment and establishes a meaningful presence in people's everyday lives, creating a unique connection between consumers, communities, and technology.

Mission

The mission of The Last Chick is founded on the following principles:

- Spreading hope, kindness, and compassion throughout the community.
- Creating new opportunities through blockchain technology and the digital economy.
- Building a diverse ecosystem that includes tokens, games, NFTs, and products.

- Connecting product purchases with participation in the TLC token ecosystem.
- Supporting children in need and vulnerable, abandoned animals.
- Building a global community based on creativity, collaboration, and social responsibility.
- Making human values an essential part of a digital brand's identity.

4. The Last Chick Ecosystem

The Last Chick is designed with a long-term vision to develop a collection of digital and real-world products and services within one integrated ecosystem.

4.1. TLC Token

The TLC token is at the core of The Last Chick ecosystem's digital economy. It is issued on the Base network and serves as the project's primary digital asset for blockchain-based interactions.

4.2. Digital Games

Gaming is one of the key ways users can connect with The Last Chick universe. This segment aims to provide entertainment, increase community participation, and expand interactive experiences.

4.3. NFT Collections

The Last Chick NFTs are inspired by the project's story, characters, and visual identity.

The Genesis NFT collection, inspired by the concept of the last light of hope in a dark world, forms part of the ecosystem's digital and artistic identity.

4.4. The Last Chick Products

One of TLC's important development paths is entering the real-world products and commercial market.

The project plans to introduce exclusive products under The Last Chick brand, creating a direct connection between the digital ecosystem and users' real-world experiences.

Under the planned commercial model, eligible customers may receive TLC tokens in addition to the products they purchase.

In this way, purchasing a product can become more than a commercial transaction; it can also provide an opportunity to enter and participate in the broader The Last Chick ecosystem.

Product categories, purchasing conditions, token allocation methods, and token amounts will be announced alongside the official introduction and launch of each product.

4.5. Web3 Experiences

TLC aims to expand its Web3 capabilities and introduce experiences that connect users more effectively with the ecosystem's products and services.

5. Token Information

Specification	Details
Token Name	The Last Chick
Token Symbol	TLC

Specification	Details
Network	Base
Standard	ERC-20
Decimals	18
Total Supply	1,000,000,000 TLC
Presale Allocation	100,000,000 TLC
Announced Presale Price	0.001 USDC

Token Contract Address:

`0x04B757D7Cb621BFb846d47B161857D5E59F5D40C`

The Base network has been selected as the primary blockchain infrastructure for TLC, allowing the project to benefit from an Ethereum-compatible environment and the capabilities of the Base ecosystem.

6. Tokenomics

The total supply of TLC is fixed at one billion tokens.

The token allocation structure is as follows:

Allocation	Percentage	Token Amount
Liquidity	25%	250,000,000
Marketing	20%	200,000,000
Ecosystem	20%	200,000,000
Development	15%	150,000,000
Presale	10%	100,000,000
Team	10%	100,000,000
Total	**100%**	**1,000,000,000**

This allocation structure is designed to support the different areas of the project:

- **Liquidity:** Supporting market infrastructure and token accessibility.
- **Marketing:** Strengthening the brand, expanding the community, and promoting the project globally.
- **Ecosystem:** Supporting games, NFTs, products, and new ecosystem capabilities.
- **Development:** Providing resources for technical progress and service expansion.
- **Presale:** Allocating tokens for the initial public offering in accordance with the sale structure.
- **Team:** Allocating a designated share to support the participation and contributions of the project team.

7. Presale and Smart Contract Infrastructure

The TLC token presale is designed to operate using USDC on the Base network.

The announced presale price is 0.001 USDC per TLC token. Accordingly:

1 USDC = 1,000 TLC

Users need USDC on the Base network and a small amount of ETH to cover network transaction fees.

Presale Smart Contract Address:

`0xb7fD96B6800dbEFD6Ba97A5a3c58e4209D7FA73A`

The smart contract infrastructure is designed to manage the presale process and record transactions on the blockchain.

Transparency and the ability to verify on-chain information are important principles of the project's technical structure.

8. Business Model and the Connection Between the Real-World Economy and Web3

One of The Last Chick's long-term goals is to establish an economic model in which real-world products and digital assets operate alongside one another.

This approach enables the project to expand beyond the digital environment and strengthen its connection with consumers and communities in the real world.

Under the proposed TLC model, the sale of exclusive products may be accompanied by token allocations. Accordingly, eligible customers may receive TLC tokens in addition to purchasing their products.

This structure pursues three important objectives:

1. Brand Expansion

Introducing The Last Chick products to the market and establishing direct relationships with customers.

2. Community Participation

Providing product buyers with opportunities to enter and participate in the project's digital ecosystem.

3. Connecting the Real-World and Digital Economies

Creating a link between product commerce and blockchain-based applications.

Through the development of this model, The Last Chick aims to create an experience in which purchasing, participation, and digital interaction become part of a shared journey.

9. Social Responsibility and TLC's Humanitarian Mission

Spreading hope and supporting those in need are among the fundamental values of The Last Chick.

The project believes that true success is measured not only by economic growth and technological development but also by the positive impact a community can create in the lives of people and other living beings.

Supporting Children in Need

One of TLC's humanitarian goals is to support children living in difficult circumstances who need care, attention, and better opportunities to build a brighter future.

The Last Chick aims to bring a message of hope to children who deserve kindness, security, and the opportunity to create a better future for themselves.

Supporting Vulnerable and Abandoned Animals

Supporting animals in need and those without shelter is also an important part of the project's social vision.

TLC believes in protecting life, caring for animals, and helping create better living conditions for vulnerable and abandoned creatures.

Making Hope a Shared Value

The goal of The Last Chick is not limited to financial support. It also seeks to promote a culture built on kindness, compassion, and responsibility.

The project aims to transform hope from a symbolic concept into a meaningful part of community participation and everyday action.

10. Roadmap

The development journey of The Last Chick is structured around four main phases.

Phase 1: The Birth of TLC

- Establishing the brand identity and story.
- Creating the TLC token on the Base network.
- Developing the official website.
- Establishing the project's communication channels.
- Building the initial community.

Phase 2: Community Growth

- Expanding the global TLC community.
- Increasing user engagement.
- Developing social and marketing activities.
- Strengthening the brand's presence in the Web3 space.
- Expanding interactive experiences and gaming activities.

Phase 3: NFT and Web3 Expansion

- Developing NFT collections.
- Expanding gaming capabilities.
- Introducing new blockchain-based experiences.
- Strengthening connections between digital products and the community.

Phase 4: Ecosystem and Product Development

- Expanding The Last Chick ecosystem.

- Entering the exclusive products market.
- Developing the product-and-token business model.
- Strengthening the connection between the real-world and digital economies.
- Advancing the project's social and humanitarian initiatives.

11. Community and Core Values

The Last Chick community is an essential part of the project's identity and future.

The ecosystem is built around four fundamental values:

Hope: Believing in the possibility of new beginnings and a better future.

Creativity: Encouraging fresh ideas and the development of innovative experiences.

Community: Building a united community whose members participate in shared growth and progress.

Compassion: Caring for people, children in need, and vulnerable and abandoned animals.

These values will guide the project's decisions and long-term development.

12. Official Communication Channels

Users can follow The Last Chick's news, announcements, and activities through the project's official communication channels:

13. Risks and Considerations

Participation in digital assets and blockchain-based projects involves technical, economic, and market-related risks.

The value of digital assets may fluctuate due to market conditions, liquidity, technological developments, and economic factors.

The development of new products, services, and features may also be affected by technical and operational conditions.

Before participating in activities related to the TLC token, users should review the project information and smart contracts and make informed decisions with an understanding of the associated risks.

This whitepaper has been prepared to introduce The Last Chick, its structure, vision, and development plans. It does not constitute financial, legal, or tax advice.

14. Conclusion

The Last Chick began with a simple yet powerful story: even in the darkest circumstances, hope can remain alive.

Through blockchain technology, the TLC token, games, NFTs, real-world products, and community participation, the project is working toward building a diverse and expanding ecosystem.

However, what defines TLC is not only technology or the digital economy. At its heart is a philosophy built on hope, kindness, and responsibility.

The vision of The Last Chick is to build an ecosystem where economic growth, innovation, and positive social impact can find meaning together.
